ASPECT

Pass-Through Windows

REBCO proudly unveils our newest product, the ASPECT line of pass-through windows offering a full range of features that were designed with customer service in mind. These easy to use sliding windows are great for businesses which require face to face interactions with customers in a variety of settings. Stylish yet durable, ASPECT windows are the best choice for trouble free performance in demanding, high traffic environments.

ASPECT

Pass-Through Windows

ASPECT pass-through windows are available as single slide or bi-parting units. Single slide units, in left-to-right or right-to-left, generally require a smaller footprint. Both the single and bi-parting models open effortlessly and quietly by way of a top-hung track and wheel system that includes anti-risers to prevent "bounce."

Self closing models of the ASPECT line of pass-through windows use an exclusive Equi-Pressure system to provide controlled closing while an integrated dashpot ensures a gentle finish.

The fully automatic models contain advanced "through-beam" technology creating zones of safety for persons and objects within the window's path of travel. A variety of sensor options are used to create the right match for each application including those with tight spaces or low levels of lighting.

All ASPECT pass-through windows use full size commercial grade locks and hardware to safeguard businesses from outside intrusion. Optional magnetic locks and enhanced framing are available when it's necessary to take security up to the next level.

ASPECT pass-through windows come standard in Clear and Dark Bronze and are available in other anodized and painted finishes. A wide variety of finishes and coating are also available to meet custom requirements. Tempered 1/4" glazing comes standard with every unit.

ASPECT windows are constructed of high grade aluminum and sealed to protect against the elements. Designed with an attention to details like a sloped sill for natural draining of spills, these units are easy to clean and care for. All windows also come with REBCO's warranty and access to our professional support staff.

Single Slide – Series 50/60/70

48" w x 41" h – Serving 20" w x 33" h
48" w x 36" h – Serving 19" w x 28" h
36" w x 41" h – Serving 15" w x 33" h

Bi-Parting Slide – Series 66/76

54" w x 41" h – Serving 20" w x 33" h
54" w x 36" h – Serving 19" w x 28" h
MAX. 92" w x 41" h – Serving 35" w x 33" h

ASPECT offers three different problem solving operating functions which include:

Self Closing – When the operator let's go of the handle, the window will gently close itself. (Also offered with an easy release magnetic hold open.)

Automatic – The window is motor driven and operated by electronic sensors which provide maximum safety and convenience.

Manual – The window is opened and closed manually by the operator using the unique self-latching handle.

All ASPECT pass-through windows are fully assembled in the United States and are ready for quick and easy installation.
